ABOUT

AP CREATIVE SERVICES

At AP Creative Services, LLC, we excel in creativity across marketing, social media management, brand management, and A/V services. With over 10 years of experience, we take pride in crafting exceptional solutions that help our clients achieve and surpass their business goals. Our approach is centered on capturing the attention that fuels our client's success. We convert our client's objectives into tailored communication strategies, featuring eye-catching graphic designs, high quality photo and video, and strategic social media management.

PRESENTATION AUDIO SYSTEMS

To effectively engage a large audience, it's essential to deliver your message with crystal-clear sound. When thousands of attendees are hanging on your every word, the last thing you need is a distracting microphone feedback or poor audio quality from a video call.

CONCERT AUDIO SYSTEMS

Watching your favorite artist perform may seem effortless, but designing and implementing a concert-grade audio system is a highly complex process. The sound system must not only deliver exceptional quality for the audience but also provide the artists with the precise tools they need for their performance on stage.

PRIVATE EVENT AUDIO

Events come in all shapes and sizes, which is why we tailor our audio system designs to suit the unique needs of each occasion, venue, and audience. Whether it's a wedding, ceremony, fundraiser, or formal event, your guests should be able to hear every word and feel every beat.

Services Catalog

PROFESSIONAL VIDEO SERVICES

Seeing is believing! Live event video engineering encompasses a variety of services, including presentation graphics, video playback, live camera streaming, and displaying content on large-scale projections, TVs, or custom LED panel surfaces. Give your guests an immersive visual experience that will leave a lasting impression.

MULTI-CAMERA VIDEO SWITCHING

Creating dynamic video displays is a meticulous and intricate process. It begins in pre-production with the development of graphics and video content and concludes with real-time live switching between various elements, such as live camera feeds. Though technically demanding, this process requires a creative flair to truly captivate and engage the audience.

LED WALL DISPLAYS

LED panel displays are among the most advanced technologies in modern live video productions. These modular panels allow us to craft custom display sizes and shapes, ensuring your event stands out with a unique, one-of-a-kind look.

Services Catalog

LIGHTING DESIGN SERVICE

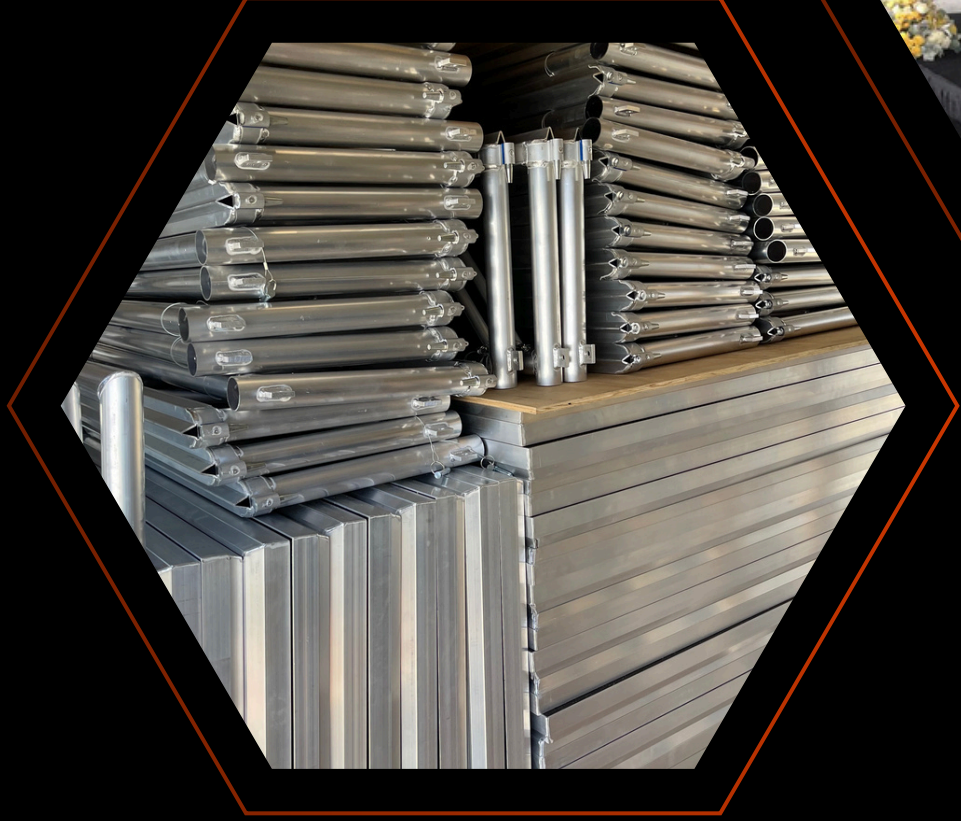

Event lighting is more than just brightening a room; when done right, it can completely transform the atmosphere and ambiance. Lighting design plays a crucial role in shaping how your guests experience and perceive your event.

STAGE LIGHTING

Watching your favorite artist perform may seem effortless, but designing and implementing a concert-grade audio system is a highly complex process. The sound system must not only deliver exceptional quality for the audience but also provide the artists with the precise tools they need for their performance on stage.

STAGING

Set yourself apart from the rest! Whether you need a small riser and podium for a single presenter or a large, multi-tiered stage with backdrops and drapery for a full-scale production, a professional stage setup provides the perfect foundation for success. Our industry-leading stage designs are available in a wide variety of shapes and sizes!

ELECTRICAL RENTAL

At any event, there are typically multiple service providers, and one common need they all share is access to a reliable power source. In high-stakes situations like event production, the last thing you want is a power failure that disrupts your event mid-show. That's why it's crucial to develop a precise electrical distribution plan for professional events.
